## **STEEL INDUSTRY SERVICES PROVIDED**

### **Ladle Refractory Maintenance**

LVR's refractory maintenance service provides careful ladle hot clean and refractory lining removal, eliminating damage to both the working and safety linings.

### **EAF Furnace Lining Patch or Removal**

LVR provides furnace refractory lining patch and removal services using GEF-530 top mount machines and GOM-BDRE mobile equipment to accommodate electric arc furnaces with diameters from 10 to 35 feet and capacities up to 400 tons.

### **EBT Taphole Change Out**

LVR provides EBT Taphole change out service using specialty engineered KT-Grant systems with a quick-change adapter installed on the GOM-BDRE machine. It efficiently removes the original taphole and inserts a new one, holding it in place for safe installation.

### **Tundish Refractory Removal**

LVR's equipment enables careful refractory removal with minimal damage to the ladle safety lining. The GOM-BDRE cleans tundishes efficiently, removing skulls and refractory material.

### **Refractory Installation**

LVR's team of highly skilled installers focuses on safety and quality above all — ensuring superior refractory performance under the safest conditions possible. Expertise in ladle, EAF furnace, reheat furnace, and AOD linings.

### **Reheat Furnace Repair and Rebuild**

LVR provides refractory installation and mechanical repair supporting major reheat furnace relines, minor repairs, and preventative maintenance programs.

***Our warehouses are stocked with a full line of materials ready for immediate shipment.***
